

ADVANCED DIPLOMA IN CNC PERATOR

COURSE DESCRIPTION

The Advanced Diploma in CMC Operator is a two-year program designed to provide students with in-depth knowledge and skills in computer numerical control (CNC) machining operations. This program covers various aspects of CNC machining, including programming, setup, and operation of CNC machines. Students will also gain knowledge of CAD/CAM software and computer-aided manufacturing (CAM) systems. The course also includes training in blueprint reading, quality control, and machine maintenance.
