

BACHELOR PROGRAM IN ELECTRICAL & ELECTRONIC ENGINEERING

COURSE DESCRIPTION

Electrical and electronics engineering is a program that focuses on the study and application of both electrical and electronic systems. In this four-year program, students learn about the principles of electrical engineering, such as circuit analysis and power systems, as well as electronic devices and circuits. They also learn about digital signal processing and control systems. Graduates of this program can work in a variety of industries, such as power generation, telecommunications, and consumer electronics.

DURATION

(REGULAR) 4 YEARS
(FAST TRACK) 1 YEAR

ELIGIBILITY

DIPLOMA/ABOVE

WORK EXPERIENCE

4 YEARS

SUBJECTS

YEAR 1

- Essentials of Management
- Basic Electronic Engineering
- Communication Systems
- Signals and Systems

YEAR 2

- Analog Integrated Circuits
- Digital Electronics
- Circuit Analysis
- Power System Instrumentation

YEAR 3

- Generation of Electrical Power
- Network Analysis and Synthesis
- Power Electronics
- Occupational Health and Hazard

YEAR 4

- Organizational Behaviour
- Safety at Workplace
- Total Quality Management
- Project

ABOUT US

In order to integrate the personnel strategy with the employer's business, we are devoted to providing qualified, talented, and professional manpower solutions to all sectors. We also provide a variety of training options to our applicants since we think it is important to support their professional development and excellence. With a large pool of applicants ranging from recent graduates to senior jobs, Job Scan can locate, screen, assess, and select prospects who meet the requirements of the hiring manager. Using our high standards for behaviors, and we respect the contributions of each customer and applicant we work with.
